FLUID LEAKS—Check for fuel, water, oil or other fluid leaks behind the surface beneath the vehicle. See precautions referenced at the end of this section.

PREVENTIVE MAINTENANCE

Preventive service closing, damaged or missing parts which might prevent proper or safe operation of your vehicle. Check also for loose nuts and bolts that could cause an injury hazard.

GLASS—Check for broken, scratched, dirty or damaged glass on vehicle that could obscure vision or become an injury hazard.

DASHBOARD LIGHTS—Check for positive operation of all lights and switches.

DOOR LATCH—Check for positive operation of all doors and latches.

ENTRANCE DOOR LATCH—Check for positive operation of the entrance door latch.

EXTERIOR ACCESSORIES AND EQUIPMENT

Check for loose or missing parts which might cause injuries or hazardous operation of the vehicle.

SEAT BELTS—Check belts and buckles for proper attachment to the seat belt anchors.

REAR VIEW MIRRORS AND SUN VISORS—Check that mirrors are clear and sun visors stay in the selected position.

DIRECTED AGAINST THE WINDSHIELD

Check that windshield wipers and washer fluid are operating properly. Check windshield wipers for proper operation. Check for fluid leaks.

WINDSHIELD WIPERS AND WASHERS

NOTE: If any item is not operating properly, have your vehicle inspected by an authorized service center.

LP GAS SYSTEM

Check for LP gas leaks. Be sure your LP gas system is properly maintained. See the operating manual for LP gas system inspection instructions.

ENGINE AND MOTOR GENERATOR EXHAUST SYSTEM

Check for any change in the sound of the exhaust system.

BRAKES—Check for proper operation of the brake system.

STEERING

Check for any changes in steering when braking or changing directions.

TRANSAXLE—Check gear shift indicator for proper operation. The transmission should shift smoothly.

STARTER SAFETY SWITCH—Check safety switch for proper operation when starting the engine.

LAP BELTS—Check belts and buckles for proper attachment to the seat belt anchors.

SEAT SWIVEL LEVERS—Check that seat swivel is locked in the desired position.

HOON—Blow the horn occasionally to be sure that it works.

DEFROSTERS—Check performance by moving controls to "DEF" and noting amount of air directed against the windshield.

WINDSHIELD WIPERS AND WASHERS

Check for fluid leaks by washing during use.

NOTE: If any item is not operating properly, have your vehicle inspected by an authorized service center.
RECOMMENDED FLUIDS & LUBRICANTS

MOTOR GENERATOR

- Engine oil
- High quality SAE 5W-30 oil
- Fluid/Lubricant

FUEL CAR, FUEL LINES AND FUEL TANKS—Inspect the fuel tank cap and lines for damage which could cause leaks, inspect fuel line connections, inspect the fuel pump and filter, inspect the fuel-injected system (ECS), check all fuel and vapor lines and hoses for proper connections and operation, inspect and replace as necessary. Check system for proper operation.

EVAPORATION CONTROL SYSTEM (TCE) — Check hoses for leakage, inspect the fuel and vapor lines and hoses for proper connections and operation, inspect and replace as necessary.

THROTTLE RETURN CONTROL (TRC) — Check the throttle valve and valve position, check for proper operation.

TIMING AND DISTRIBUTOR CAP—Adjust ignition timing following the specifications on label attached to the engine rocker cover.

SPARK PLUG WIRES—Clean or replace wires. If corrosion cannot be removed or other conditions, replace plugs and spark plugs with properly designed plugs. Inspect any evidence of corrosion on and terminals. Inspect spark plug wires for evidence of checking, burning, or cracking. If necessary, replace spark plug wires.

FUEL PUMP—Inspect the fuel pump for proper operation, remove any evidence of corrosion or contamination, replace fuel pump if necessary.
